Profile Summary

Frontend Developer with **4+ years** of experience building enterprise-grade web applications using React, TypeScript, and modern frontend technologies. Experienced in scalable component architecture, state management, performance optimization and micro frontend architectures. Delivered complex, workflow-driven interfaces across corporate, aviation, and HR domains. Actively use AI-powered development tools, including **Cursor** and **Claude Code**, to support coding, code analysis, debugging, and development workflows. Collaborate with cross-functional teams to deliver maintainable, reliable, and production-ready applications. Currently expanding my backend development skills to broaden my expertise beyond frontend and pursue **full-stack** development opportunities.

Professional Experience

Frontend Developer, *ID3* 2026/03 – 2026/09
- Developed enterprise React applications for aviation and HR clients, collaborating with backend and product teams on permission-aware, workflow-driven interfaces.
- Contributed to **SunExpress** products, primarily QRMS (Qualification & Record Management System), supporting aviation personnel qualification, record management, and approval workflows.
- Built features for Easy Payment, Tour-Operator planning (TOPMT), and Payment-Device application flows.
- Delivered a production HR Portal for **Tarım Kredi** using a React **microfrontend** architecture, supporting recruitment workflows, interview management, and multi-company HR operations.

Frontend Developer, *NTT DATA Business Solutions TR* 2022/06 – 2025/08
- Developed enterprise React applications for corporate clients across finance, learning, and HR, collaborating with internal and client-side product teams.
- Helped launch **BSH's** Clicq platform, used by **10,000+** employees worldwide to track competencies, training plans, and development activities. Built the frontend with React, Material UI, DevExtreme, and React Query, including LDAP authentication.
- Contributed to **Bosch Türkiye's** nationwide dealer and customer portal, building responsive, reusable components and API-driven flows that digitized dealer operations for thousands of corporate clients.
- Built and improved the admin panel of an LMS for one of Turkey's largest holdings, covering course creation, assignments, exams, and progress tracking.

Junior Frontend Developer, *Kurumsal Yazılım ve Danışmanlık* 2021/06 – 2022/06
- Developed frontend features for a **cloud-based ERP** application using React, Redux, Material UI, and DevExtreme.
- Implemented forms, tables, and data-intensive interfaces supporting day-to-day enterprise workflows.
- Managed shared application state with Redux and contributed to reusable component structures and maintainable UI patterns.

Education

Computer Engineering, *Düzce University* 2016/09 – 2021/06 | Düzce, Türkiye
Bachelor's Degree

Skills

Programming Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks & Libraries: React.js, Next.js, Redux, Redux Toolkit, MobX, React Query, React Router, Axios, Formik, Yup
UI & Styling: Tailwind CSS, Material UI (MUI), Ant Design, SCSS/SASS, Bootstrap, DevExtreme
Architecture & Web Development: Microfrontends, Responsive Design, Reusable Components, REST API Integration, Code Refactoring, CI/CD Workflows, Agile/Scrum
Tools & Technologies: Git, GitHub, Azure DevOps, Jira, Vite, Webpack, Babel, Storybook, REST APIs, Swagger, Node.js, Firebase, MongoDB, Figma, Vercel
AI-Assisted Development: Cursor, Claude Code, GitHub Copilot, ChatGPT, AI-Assisted Codebase Analysis, Multi-File Code Implementation, Debugging, Refactoring
